# Severe Obstetric Complications (SOC)

Patients with severe obstetric complications (SOC) which occur during the inpatient delivery hospitalization

**Sample Calculation (rate per 10,000 deliveries)**

**Performance Rate =** $\frac{\text{Numerator (a=8 patients)}}{\text{Denominator (b=100 patients) - Denominator Exclusions (c=10 patients)}}$ X 10,000 = 888.9

**Stratification 1 =** $\frac{\text{Stratification 1 (a1 = 5 patients)}}{\text{Denominator (b=100 patients) - Denominator Exclusions (c=10 patients)}}$ X 10,000 = 555.6

*SMM=Severe Maternal Morbidity indicators as defined by CDC (see specs for more details)
