

## Comparison of Core and Advanced Hip & Knee Replacement Certification

Program Concept	Core	Advanced
Scope of Program Review	Hospital or ambulatory surgery center only	Physicians office(s), inpatient/hospital based outpatient/am- bulatory surgery center and post follow-up care organizations
Surgical Procedures Performed	<ul> <li>Core certification options for organization:</li> <li>Core hip certification</li> <li>Core knee certification</li> <li>The program has been operational long enough to have served at least 10 relevant patients for hip or knee.</li> <li>*Two certification decisions for the combined core hip and core knee certification</li> <li>*Must perform surgeries based on core program(s) chosen</li> </ul>	<ul> <li>Advanced certification for organization:</li> <li>Must perform both total hip replacement and total knee replacement</li> <li>Organizations must have served a minimum of 20 patients — 10 who have undergone primary total hip replacement and 10 who have undergone primary total knee replacement.</li> <li>*One certification decision for the whole total hip and total knee replacement program</li> </ul>
Visit and Tracer Sites	<ul> <li>Hospital</li> <li>Ambulatory surgery center</li> </ul>	<ul> <li>Physician office visit and/or direct communication with office staff</li> <li>Hospital</li> <li>Ambulatory surgery center</li> </ul>
Review Days	Review day (1 day) • Core hip certification • Core knee certification	<ul> <li>Review days:</li> <li>2-day intense review of entire total hip and total knee replacement program</li> </ul>
Standards	Core standards disease-specific care	Core standards disease-specific care + advanced standards for advanced certification for total hip and total knee re- placement
Surgical Tracer	Visit and communication with peri-operative team	<ul> <li>Surgical observation and conversation with entire perioperative team</li> <li>Observation of hand-offs between each care area</li> <li>*Arrange for reviewer to observe either a total hip or total knee replacement day 1 or day 2 of review</li> </ul>
Hand-Offs	Discussion with staff regarding hand-offs	Direct observation of hand-off communications throughout entire care continuum

## Comparison of Core and Advanced Hip & Knee Replacement Certification

Program Concept	Core	Advanced
Communication and collaboration	Team within the hospital     Working toward High Reliability	<ul> <li>Communication, collaboration, and shared decision making throughout the entire continuum of care</li> <li>Continuum of care contains: <ul> <li>Physician's office visit to preoperative area, preoperative area to intraoperative area, intraoperative area to postoperative area, postoperative area to patient care unit, patient care unit to discharge, discharge to physician's office for follow-up care, and any post discharge care</li> <li>Includes hand-offs/transitions within care areas</li> <li>Consensus among practitioners to limit variation using concepts of High Reliability</li> </ul> </li> </ul>
Uniformity	Program in the hospital or ambulatory surgery center	<ul> <li>Across the entire care continuum</li> <li>Physician office(s), inpatient / hospital based outpatient / ambulatory surgery center, and post discharge</li> <li>Consistency of all physicians in the program. No significant outliers in physician practice</li> </ul>
Order Sets	Movement toward standardized order sets for all phy- sicians	Consistent use of standardized order sets for all physicians
Preoperative Optimization	Notes regarding this being completed	All notes need to be available from providers as part of the medical record
Standardization	<ul> <li>Clinical practice guidelines</li> <li>Order sets</li> </ul>	Clinical practice guidelines follow the entire scope of the program (i.e., preoperative assessment and testing, periop- erative procedures, postoperative pain management, antibi- otics, mobility, DVT prophylaxis) Order sets • Among physician(s) inpatient / hospital based outpatient / ambulatory surgery center across the care continuum from office(s) through follow-up visit • Specific guidelines for both hip and knee

## Comparison of Core and Advanced Hip & Knee Replacement Certification

Program Concept	Core	Advanced
Physician Engagement	Physician champion / medical director identified, in- volved in program initiatives	<ul> <li>Medical director identified</li> <li>Surgeon(s) involvement (i.e., program initiatives, team meetings, data analysis, performance improvement, staff in-service and education)</li> </ul>
Patient Education	Content review of preoperative education (i.e., joint class)	<ul> <li>Content review of preoperative education (i.e., joint class)</li> <li>Direct observation of a portion of the class (no minimum class number required), perioperative patient interviews, therapy sessions, patient discharge teaching, or other patient education</li> </ul>
Post Discharge	Review hospital / ambulatory surgery center discharge process	<ul> <li>Review discharge process</li> <li>Review data communication from post discharge entities to see engaged tracking through patient follow-up visit</li> </ul>
Functional Outcomes	Should be considering, if not implementing, some form of functional outcome measures	Should have strong functional outcome data
Performance Measures	4 performance improvement measures of organiza- tion(s) choice (2 of 4 must be clinical)	<ul> <li>4 standardized performance improvement measures</li> <li>Use of Regional Anesthesia, DOS Ambulation, Discharge Disposition and Pre-operative Functional Assessment completed</li> <li>Must be participating with AJRR</li> </ul>
