# Optional Self-Assessment for Primary Care Medical Home (PCMH) Certification for Ambulatory Health Care Centers

The following tool is a useful document that may be helpful to your ambulatory care practice as you pursue PCMH certification for your facilities. The tool assesses Elements of Performance (EPs) which are the actions, processes and structures that must be implemented to achieve the standard. These EPs are in addition to those required for your ambulatory care accreditation.

Survey Activity line below each explanation indicates which activity within the survey should be addressed.

If you would like to use this tool, you may find it most beneficial to consider all sites you are considering for PCMH certification.

- ✓ Check "yes" when your organization believes it is in compliance with a question.
- ✓ Check "no" when your organization is not in compliance

Based on your answers, your organization may be able to highlight areas where continued work needs to be completed in order to be in compliance with the standards..

#### I. OPERATIONAL CHARACTERISTIC: PATIENT-CENTEREDNESS

#### Providing Information to Patients: PCMH and Primary Care Clinician

1. The organization/site **provides information to the patient** about: (indicate <u>Yes</u> or <u>No</u> to each item)

165	NU
	☐ The mission, vision, and goals of the primary care medical home.
[	[RI.01.04.03/EP 1]

	Qualifications of Primary Care Clinician & Interdisciplinary Team				
1.	<b>Primary care clinicians have the educational background</b> and broad-based knowledge and experience necessary to handle most medical and other health care needs of the patients who selected them. This includes resolving conflicting recommendations for care [HR.03.01.01/EP 1]				
	A primary care clinician is a Doctor of Medicine or osteopathy, or an advanced practice nurse or physician assistant practicing in collaboration with a Doctor of Medicine or osteopathy. The term "collaboration" in this context means that health care providers work together to meet the needs of the patient. It is not the intent of this requirement to impose additional restrictions on the scope of practice of an advanced practice nurse, nor is it meant to preempt applicable state law.
