REMINDER: Deadline Approaching for CY2022 ORYX® Performance Measurement Data Submission

The Joint Commission is reminding its accredited **acute care hospitals**, **critical access hospitals**, and **freestanding psychiatric hospitals** that the deadline to submit calendar year (CY) 2022 performance measure data via the Joint Commission's Direct Data Submission Platform (DDSP) is June 14, 2023. Data must be submitted to meet the ORXY® performance measure requirement for the following types of organizations:

- Organizations required or electing to submit chart-abstracted data must enter and submit CY2022 data for all four quarters.
- Organizations required or electing to submit electronic clinical quality measures (eCQMs) must upload, verify, and submit three self-selected quarters.

Organizational staff with access to the DDSP should verify that data have been submitted and download the submission report.

Organizations can visit the ORYX Performance Measurement Reporting page on The Joint Commission's website to review which requirements are applicable to their organization as well as the list of available measures. For more information, visit The Joint Commission's Performance Measurement page. Questions regarding the DDSP may be directed to the ORYX Help Line. **P**
